

Live Shot Hot Seat LTN Studio Options

Spot Media Transfer, now Spot Streaming has been in the live shot business for many years, our reputation in network news is stellar. For over a decade we have offered services through our dual path Sprinter satellite truck, we are now offering hot seat live shots via LTN.

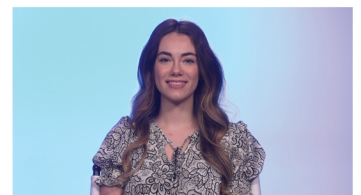

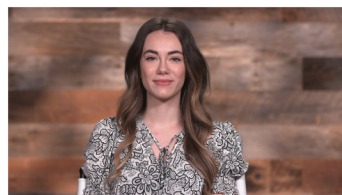

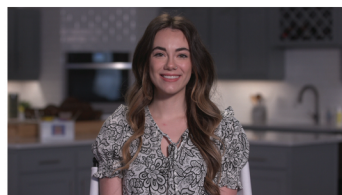

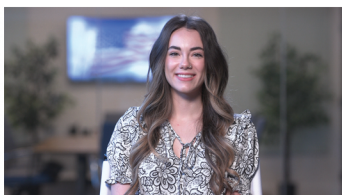

We have installed a manufacturer certified bidirectional LTN Leaf system in our Saint Louis television production studio.

We have several "looks" to accommodate different shows and editorial context. Our most versatile room features a 85" 4K screen as a frame edge to frame edge background. The screen can display any graphic you send or you can choose from several iconic Saint Louis postcard shots.

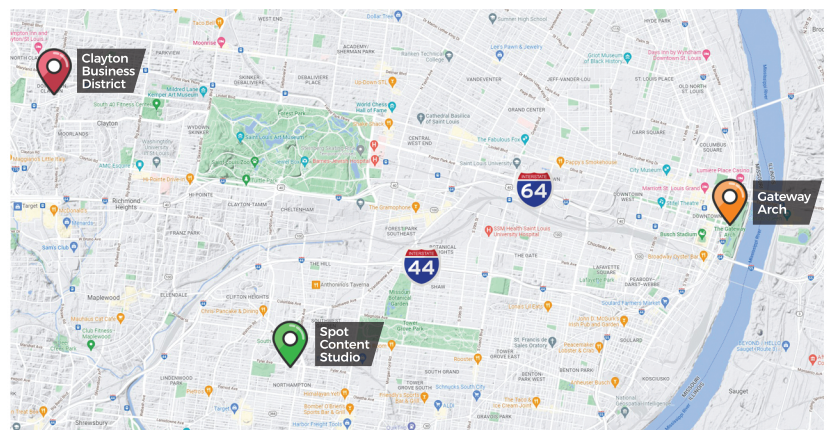

For special or topical shows, we also have a kitchen studio scene, a contemporary glass conference room with monitor background, a rustic barn wood siding option, if none of these suits your needs we have a cyc wall with RGB lighting to reflect any color needed. With a section of cable, we can even take the shot outside for an outdoor grass and tree look.

Spot Content Studio is located just west of downtown in Saint Louis, Missouri situated just minutes from Interstates 64 and 44.

The Gateway Arch - 12 MIN DRIVE
Saint Louis Airport - 20 MIN DRIVE
Clayton Business District - 10 MIN DRIVE

Our address is 5550 Fyler Avenue Saint Louis, Missouri 63139
